

AW *International*

Making clear water out of thin air

Pioneer in the Atmospheric Water Generation technology for extracting water from humidity from the air.

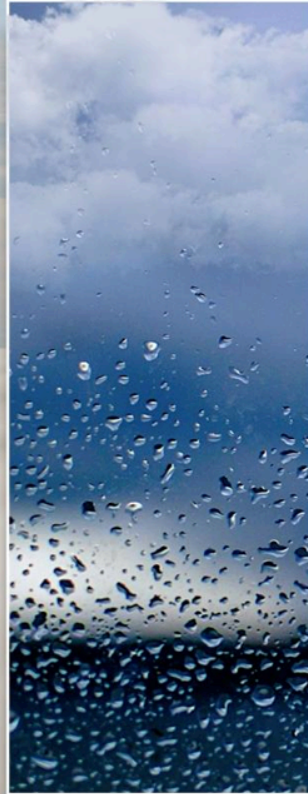

Drawing from the renewable ocean, rivers, lakes or big areas with water, will bring the vapor in the air to make it great potable water, 100% pure and healthy, Our technology is the most cost effective transforming humidity into an abundant source of clean water near the point of use.

Our scalable and modular systems are the responsible alternative and solution to the world's water crisis.

Our Vision

AWG International Ltd. will continue to lead the pack on research and development in the field of Air-to-Water Technology. The company's 3rd Generation water machines for home/office and Industrial AWI Units will set the industry's standard, making AWG International Ltd. the most recognized and trusted market leader in the world.

Our Mission

Our mission is to provide pure, bacteria free, clean and healthy drinking water throughout the world. Providing water for drinking, catastrophes, agriculture and satisfy the thirst of the masses.

Air-to-Water Generation will provide food for humanity during the threatening water crisis of the 21st century. Clean drinking water is among the world's most valuable commodities and is becoming increasingly limited; set to be a more valuable commodity than oil. **WATER FOR THE WORLD.**

AW 2500

A home and office countertop unit that can produce the cleanest, healthiest, best tasting drinking water on earth.

With a low carbon footprint - no plastic bottles to throw away or fuel savings for weekly deliveries, proprietary technology that ensures you are getting the safest water available - you can enjoy delicious drinking water from the air while protecting your family and the environment. Right at your home or office.

Storage capacity is 13 liters.

Can produce up to 20 liters per day from the air.

AW 250

Semi Industrial Atmospheric Water
Unit that can produce up to 1,000
liters per day.

Fully automated process, great
filtration system, sterilizer,
movable wheels that allow easy
movement when needed,
waterproof and with a network
monitor option available.

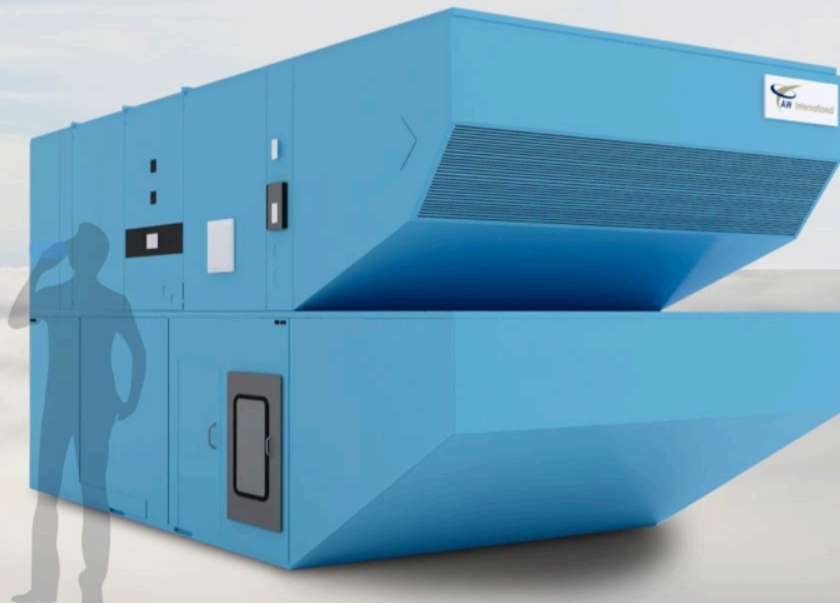

AW 400

An industrial unit that can produce up to 2,000 liters per day of clean drinking water from the air. AWI 400 can also include optional air conditioning functionality. (25 Tons Unit capable of temperaturizing 10 thousand square feet.) Excellent for Greenhouses

Ideal applications include Disaster Response, Hospitals and Apartment Buildings.

Storage capacity of 1,800 liters.

AW 800

Industrial unit that can produce up to 3,000 to 3500 liters per day of clean drinking water from the air.

Ideal applications include:

- Resorts and Hotels
- Apartment Buildings
- Hospitals
- Disaster Response
- Community drinking water
- Hydroponics

Storage capacity of 1,800 liters

20 feet ISO Container which makes it very agile to move to any place..

AW 5K

AWI 10K is a powerful industrial unit that can produce 40,000 liters per day of clean drinking water from the air.

Ideal applications include:

- Resorts and Hotels
- Apartment Buildings
- Hospitals
- Disaster Response
- Community drinking water
- Hydroponics- Municipalities –
- Towns – Villas -

Keith White

- CEO and CTO -

Keith White is the Chief Executive Officer and Chief Technology Officer of the Company. He is the founder of AW International Inc. During the past 17 years, Mr. White has designed and developed a number of air-to-water appliances and has gained extensive expertise in the technology. He Also has worked with a number of different manufacturers and suppliers to develop and deliver cost effective and reliable designs for atmospheric water generators ranging from personal/residential use equipment to commercial/industrial equipment.

Julio R. (Tito) Matos Capifali

- Solution Development -

Over 45 years in the Marketing and Advertising Industries with vast experience and many success stories in product launching and development. Founder of several Organizations, from Cultural to Sports, still active after over 30 years with excellent contacts and understanding of the North and South Latin American Markets and Cultures.
